

Remote Work Survey Results

The Nebraska Association of Public Employees received over 1,700 responses to our survey regarding remote work.

Respondent Demographics:

1,404 work remotely in some capacity and 186 have done so so prior to March 2020.

The majority of survey respondents are veteran state employees.

1,157 have been in state service since at least 2020 (66.8%)

551 have been in state service for more than a decade

227 have been in state service for more than two decades

89 possess over three decades of institutional knowledge and experience

This data shows that our state agencies are at risk of losing employees with years of Institutional knowledge.

As a direct result of the Executive Order:

797 State Employees are considering looking for a new employer.

593 State Employees are actively looking, have already applied, or have already accepted a job with a new employer.

In other words, we may lose as many as **1,390** public servants as a result of the EO. That equates to approximately **16% of our NAPE/AFSCME workforce.**

If the EO was rescinded

1,210

say they would stay with the State of Nebraska

As a direct result of the Executive Order, we are poised to lose:

More than

50

employees who work in Child & Family Services protecting vulnerable youth of Nebraska.

This equates to a loss of at least **10%** of the workforce.

More than

100

employees who work to provide services to Nebraskans with disabilities

This equates to a loss of at least **33%** workforce.

More than

200

employees who provide social services to Nebraskans in need

This equates to a loss of at least **25%** of the workforce.

More than

50

employees who keep Nebraskans safe as engineers and scientists

This equates to a loss of at least **20%** of the workforce.

More than

25

employees who assist Nebraskans in finding gainful employment

This equates to a loss of at least **16%** of the workforce.
